

# Insulation Materials That Energize Transformer & Motor Performance

It takes more than quality insulation to protect OEM, repaired and re-built motors, transformers and generators from heat and friction.

At PEI, we've been giving our customers that "something extra" for more than 60 years by manufacturing, converting and distributing:

- > Banding Tape
- > Laminates
- > Polyimide Film
- > Dacron Felt
- > Mica Tape
- > Surge Rope

Our unmatched ability to customize a wide range of solutions to your specific applications means that PEI can help you achieve the productivity levels you need to stay competitive.

In today's demanding marketplace, we pay close attention to all your needs, meet every request, and exceed your expectations with world-class products and customer service.

To get energized about the world's best selection of custom and standard insulation products, contact Bill Simpson at +1 412.462.6300, e-mail [info@peipittsburgh.com](mailto:info@peipittsburgh.com) or visit our web site at [www.peipittsburgh.com](http://www.peipittsburgh.com)
